ACTG 4740	Valuation and Modeling	FIN4630, ACTG4610	4	_____	_____
ACTG 4_____	Other advisor-approved ACTG courses	Varies	4	_____	_____
Accounting or Business electives			16		
<i>All electives must be advisor approved. Students may choose 16 additional elective credit hours from the accounting courses above or from other appropriate programs in the Daniels College of Business.</i>					
Total Credits for MAcc			40-56¹		

¹Entering MAcc students must demonstrate competency in four prerequisite courses in order to complete the MAcc in 40 credit hours. Students may be admitted to the program before the prerequisites are met. In this case, students take the prerequisite courses as they complete the MAcc program and the student’s degree plan may range from 40-56 credit hours.

Competency in introductory accounting courses can be demonstrated by earning a B- or better in equivalent courses at a regionally accredited institution. Competency in intermediate accounting courses can be demonstrated by passing equivalent courses at an AACSB-accredited business school. Students with any other prior coursework must demonstrate competency by passing an on-campus exam.

For detailed academic policy information, refer to Graduate Student Handbook. An overall GPA of 3.0 and an accounting GPA of 3.0 are required for graduation. Electives must be graduate (4XXX-level) courses.

Program requirements are subject to change without notice.
